REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest a method of attaching a pair of end caps to a core of a feed roll including providing a pair of end caps and expansion members such that each end cap and each expansion member is constructed of a molded plastic material and each expansion member is integrally connected to a respective end cap and held in substantial alignment with its respective core securing portion by a frangible connection so that each end cap and the associated expansion member are provided as a single molded plastic component, breaking the frangible connection between each expansion member and the associated end cap to separate each expansion member from the associated end cap as each expansion member is being moved inwardly relative to each core securing portion, in combination with all of the other claim limitations of claim 1.

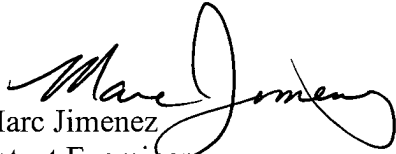

Furthermore, the prior art does not teach or suggest an end cap system for mounting a feed roll including an end cap and expansion member constructed of a molded plastic material and the expansion member is integrally connected to the end cap and held in substantial alignment with the core securing portion by a frangible connection so that the end cap and expansion member are provided as a single molded plastic component, in combination with all of the other claim limitations of claim 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
